Confidence-Building and Parameters of Trust in Police

Original Research, B13

Saedi A.M. and Ghasemnejad K.

ABSTRACT: The current study deals with the ways of confidence building versus police and determines indices of trust in police. This study aims to identify the variables that affect the confidence in police and proposes strategies to improve the relationship between the police and society. The results indicate that factors such as societal participation, sense of security, trust index, police authority, and obedience to law rule of law (action based on disciplinary regulations) play significant roles in building confidence in police. The study recommends that police departments develop strategies to enhance these factors to improve the relationship with the public and increase trust in the police. Keywords: Trust Index, Police, Societal Participation, Sense of Security.
