**Relationship between emotional intelligence and leadership style in middle manager**

Original Research, C1

Khorshidi A, Tarkhan F. and Naghsh Z.

**ABSTRACT:** This article investigates the relationship of emotional intelligence and leadership style in middle managers. The study aims to explore how emotional intelligence influences leadership style, specifically transformational-oriented and pragmatic leadership styles. Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

**Keywords:** Emotional Intelligence, leadership style, Middle Manager.

Family Communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents

Original Research, C3

Jowkar B., Rahimi M., Zare M. and Barzegar Bafrooei K.

ABSTRACT: Adolescents

Keywords: Conversation, Conformity, Separation-Individuation
ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students from Bandar Abbas high school have been selected and their personality traits have been evaluated by using big five personality test. Also, their general health has been evaluated by using health questionnaire. It has been found that there are significant relationships between personality traits and general health of students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Keywords: Personality Traits, General Health, Female Students.
