**Relationship between emotional intelligence and leadership style in middle manager**

**ABSTRACT:**
This article investigates the relationship of emotional intelligence and leadership style in middle managers of media. To identify the relationship of emotional intelligence and leadership style in middle manager, the linear regression was used. Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

**Keywords:** Emotional Intelligence, leadership style, Middle Manager
ABSTRACT: Today the subject of internationalization of higher education curricula across the world activities and methods of teaching and learning) in countries like the United states America, Finland, and Japan.

Keywords: Internationalization, Higher Education, curriculum educational systems, comparative study.
**Abstract:**
Adolescents' egocentrism is a controversial concept in cognitive developmental theories and there are little studies that investigated the role of family communication dimensions, separation-individuation and imaginary audience in Iranian adolescents. The present study aimed to examine these variables and identify the direct and indirect effects of family communication dimensions on imaginary audience using structural equation modeling. It was found that family communication dimensions had a significant impact on imaginary audience, and the indirect effect of family communication dimensions on imaginary audience was mediated by separation-individuation. This mediation role of separation-individuation between family communication and imaginary audience is clearly revealed in the explained model elaborated in the article.

**Keywords:** Conversation, Conformity, Separation-Individuation, Imaginary Audience.
ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were selected from high school students in Bandar Abbas, Iran for this study. The results indicate a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

Keywords: Personality Traits, General Health, Female Students
Network Policy Making: A Necessity for Today’s Organizations

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT:
The highly changeable and inconstant condition of organizational environments, including public and private organizations, requires the establishment of networks that include new policies, strategies, and managerial tools to be able to provide their services in the form of products and services, as well as to meet the customers' needs in today's business revolution. In this paper, the importance of network policy making is introduced in order to support and manage these networks. The importance of network policy making is demonstrated through a method that applies all of the network policies to the organizations. The conclusion of the paper provides theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords:
Policy making, Decision making, Network structure
