ABSTRACT: Today the subject of internationalization of higher education curricula across the world has been accompanied with the issues such as rapid changes, increased competition, and an increasing number of global activities. This paper presents a comparative study of the methods and activities of teaching and learning in countries like the United States of America, Finland, and Japan. The results indicate that internationalization has led to changes in the curricula of higher education institutions, making them more diverse and inclusive. Keywords: Internationalization, Higher Education, curricula, teaching methods, comparative study.
ABSTRACT:

Adolescents egocentrism is a controversial concept in cognitive developmental theories and there are little studies that investigated it. This study is focused on investigating the role of adolescents egocentrism in Family Communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents. A causal model was used to test the direct and indirect effects of FCP on IA and the mediation role of PATHSEP between FCP and IA. This explanatory model is elaborated in the article.
