Keywords: Emotional Intelligence, leadership style, Middle Manager.
Internationalization of higher education curricula across the world

Original Research, C2

Behjat Ardakani, F and Araghieh A,

ABSTRACT: Today the subject of internationalization of higher education curricula is addressed in a variety of countries across the world. This is evidenced in countries such as the United States, America, Finland, and Japan. The internationalization of higher education curricula involves the implementation of diverse activities and methods of teaching and learning. The study aims to analyze the challenges and opportunities associated with internationalization of higher education curricula. The findings highlight the importance of adopting a holistic approach to internationalization, encompassing cultural diversity, language proficiency, and technological integration. Future research should focus on developing strategies to enhance the effectiveness and impact of internationalization initiatives.

**Evaluation of Relationship between Personality Traits and General Health of High School Students**

**Original Research, C4**

**Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.**

**ABSTRACT:**

The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were chosen and they completed the Beck Depression Inventory (BDI) and the Big Five Personality Inventory (BFI). The results show that there is a positive relationship (p < 0.05) between Neuroticism and general health of students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, requires changes in decision making and policy making in order to control the level of performance. The most important advantage of network structures is that they can achieve better results through decision-making processes. This study focuses on the importance of policy-making and provides theoretical and applied suggestions to improve decision making in organizations. It finally provided theoretical and applied suggestions in order to prepare organizations for progressing in this direction.
