**Evaluation of Relationship between Personality Traits and General Health of High School Students**

**Original Research, C4**

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

**ABSTRACT:** The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were sampled from high school students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

**Keywords:** Personality Traits, General Health, Female Students
Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, and globally competitive market forces require a different approach to organizational decision making. Hence, the concept of network structure, management, and social capital are crucial in modern organizations. This paper provides a theoretical and applied discussion about the necessity for adopting networks of policy making in today’s organizations. Finally, it provides theoretical and applied suggestions in order to prepare organizations for progressing in this direction.
