Evaluation of Relationship between Personality Traits and General Health of High School Students

Original Research, C4

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were selected from the high school of Bandar Abbas, Iran. The personality traits of extraversion, openness (flexibility), agreeableness, conscientiousness and general health of students were measured using EMBRACE and EBIQ. The results showed a significant relationship between personality traits of extraversion, openness (flexibility), agreeableness, conscientiousness and general health of students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Network Policy Making: A Necessity for Today's Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, has led organizations to consider the network management system as a very effective and effective method of organization. This paper aims to discuss the importance of this system by providing theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords: Policy making, Decision making, Network structure.
