Pragmatic style is explained by self-awareness and empathy. Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

Keywords: Emotional Intelligence, leadership style, Middle Manager
ABSTRACT: Today the subject of internationalization of higher education curricula across the world is becoming increasingly important. The rapid changes in the global economy, technology, and society have led to a growing need for educational systems to adapt and incorporate international perspectives in their curricula. Countries such as the United States, America, Finland, and Japan are examples of nations where internationalization efforts in higher education curricula are actively being pursued. This trend is driven by various factors including economic globalization, cultural exchange, and the demands of a increasingly interconnected world.

Evaluation of Relationship between Personality Traits and General Health of High School Students

Original Research, C4

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students of high school in Bandar Abbas were selected by convenience sampling method. In this study, personality traits were measured using the Minnesota Multiphasic Personality Inventory and general health was assessed using the General Health Questionnaire. The results revealed a significant negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant conditions of organizational environments, including public and private sectors, have brought a new kind of challenge, leading to the necessity of developing new strategies and theories in order to solve the problems of today’s organizations. In the mentioned conditions, as it is shown in the existing studies, the network structure has been proved to be a new strategy for the organizations to respond to these challenges. As it is mentioned in the related literature, the network structure creates value through the interaction of its members. Therefore, one of the most important factors that need to be considered in the network structure is the network management which is the activity of managing the network structure. In the present study, through the presentation of the developed model and the theoretical and applied suggestions, it is tried to provide theoretical and applied supports for the organizations to respond to these challenges in the framework of the network structure.
