Evaluation of Relationship between Personality Traits and General Health of High School Students

Original Research, C4

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students in Bandar Abbas have been selected and their Personality Traits were measured using the FFM Big Five Questionnaire. Also, their general health was measured using the Health Questionnaire. The results showed that there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT:
The highly changeable and inconstant condition of organizational environments, including public and private sectors, has increased in recent years. This change has led to the necessity of reorganizing policies and strategies for companies. In this study, the importance of network policy making is emphasized. The necessity of network policy making is explained in order to face the challenges of changing environments. The article studies the importance of network policy making and management in organizations and aims to help organizations in managing network structures and social capital. Finally, provided theoretical and applied suggestions in order to prepare organizations for progressing in this direction.
