Relationship between emotional intelligence and leadership style in middle manager

Original Research, C1

Khorshidi A, Tarkhan F. and Naghsh Z.

ABSTRACT: This article investigates the relationship of emotional intelligence and leadership style in middle manager. The study used a questionnaire调查 to collect data from middle managers in a media organization. The results showed a significant positive relationship between emotional intelligence and transformational leadership style. Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy. Keywords: Emotional Intelligence, leadership style, Middle manager
ABSTRACT: Today the subject of internationalization of higher education curricula across the world has been accompanied with the issues such as rapid changes, education systems, and comparative studies. This paper aims to present a comprehensive overview of the current state of internationalization in higher education curricula, focusing on countries like the United States, America, Finland, and Japan. The paper discusses the methodologies and approaches used in these countries to internationalize their educational systems, including the integration of international students, cultural exchange programs, and the adaptation of teaching methods to accommodate international students. The research further highlights the importance of creating a cohesive and inclusive educational environment that values cultural diversity and promotes global awareness among students. The paper concludes with recommendations for future research and strategies to enhance the internationalization process in higher education curricula globally.
Family Communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents

Evaluation of Relationship between Personality Traits and General Health of High School Students in Bandar Abbas

Original Research, C4

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were divided into study and control groups and personality traits were measured using personality assessment using a standardized questionnaire and the scores were placed on the general health index. The results showed a significant relationship between personality traits of extraversion, openness (flexibility), agreeableness, conscientiousness and general health of students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, and the increasing complexity of organizations and their environments have created the necessity for a new approach to policy making. This paper introduces the idea of network policy making which is a result of the existing social capital in organizations and their environments. The paper finally provided theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords: Policy making, Decision making, Network structure.
