Evaluation of Relationship between Personality Traits and General Health of High School Students

Original Research, C4

Zarei, E. Zeinalipour H. Tayebi sough M. Adli M. and Tayebi sough A.

ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were selected and divided into two groups of 105 in the experimental group and 100 in the control group. The results indicated a significant positive relationship between extraversion and general health of students and there is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452 % of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant conditions of the world require that organizations take notice of the need to create an environment and structures to enhance their adaptability and resilience. In this study, it is argued that network structure along with its management is a powerful tool to achieve this goal. The article also provides theoretical and applied suggestions in order to prepare organizations for progressing in this direction.

Keywords: Policy making, Decision making, Network structure
