**ABSTRACT:**
This article investigates the relationship of emotional intelligence and leadership style in middle manager. The study reveals that Transformational-oriented style is explained by empathy; and Pragmatic style is explained by self-awareness and empathy.

**Keywords:** Emotional Intelligence, leadership style, Middle manager
ABSTRACT: Today the subject of internationalization of higher education curricula across the world
ABSTRACT: Adolescents
Keywords: Conversation, Conformity, Separation-Individuation
ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students were selected from 4 grades of high school in Bandar Abbas in 2012, and data was collected using different methods. Using a linear regression model, the results showed a significant positive relationship between extraversion and general health, and a negative relationship between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, has led to an increase in the need for effective decision-making processes. One effective approach to this issue is the use of policy networks. This study examines the importance of policy networks in organizations and provides a theoretical and applied perspective on their role. Keywords: Policy making, Decision making, Network structure
