ABSTRACT: The current research has been performed due to evaluation of ties of personality traits and general health. 205 students from Bandar Abbas High School were selected as participants of the research. The data collected through the Big Five Personality Questionnaire and Health Questionnaire were analyzed using the Pearson correlation coefficient and SPSS software. The results showed a positive relationship (p < 0.05) between extraversion and general health of students and there is a negative relationship (p < 0.05) between neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

Network Policy Making: A Necessity for Today’s Organizations

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant conditions of organizational environments require developing and building new networks for decision-making processes. This study, in line with the new world condition, emphasizes the importance of providing necessary networks for organizational management. It also presents strategies for creating functional and strategic networks for the development of organizations.

Keywords: Policy making, Decision making, Network structure.
