**Relationship between emotional intelligence and leadership style in middle manager**

**Original Research, C1**

**Khorshidi A, Tarkhan F. and Naghsh Z.**

**ABSTRACT:** This article investigates the relationship of emotional intelligence and leadership style in middle manager. The study found that emotional intelligence is positively related to transformational leadership style, whereas it is negatively related to autocratic leadership style. The study also found that self-awareness, self-regulation, and empathy are the key components of emotional intelligence that explain the relationship between emotional intelligence and leadership style. The findings of this study have important implications for the development of effective leadership in middle managers.

**Keywords:** Emotional Intelligence, leadership style, Middle Manager.
ABSTRACT: Today the subject of internationalization of higher education curricula across the world today has been accompanied with the issues such as rapid changes, globalization, and international mobility of students. These issues have led to a gradual evolution in the activities and methods of teaching and learning in countries like the United States America, Finland, and Japan.
