**ABSTRACT:**
Adolescents' egocentrism is a controversial concept in cognitive developmental theories and there are little studies that investigated the effects of this concept on social and communication skills during adolescence. The current study investigates the relationship between family communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents. The results showed a significant and direct relationship between family communication dimensions, Separation-Individuation and Imaginary Audience in Iranian adolescents. Moreover, the analysis revealed the mediation role of PATHSEP between FCP and IA. This explanatory model is elaborated in the article.

**ABSTRACT:**

The current research has been performed due to evaluation of ties of personality traits and general health. The research has been conducted on 205 high school students in Bandar Abbas. The result of the research shows a positive relationship between Extraversion and Neuroticism and general health. There is a negative relationship (p < 0.05) between Neuroticism and general health of students. Neuroticism predicts 0.452% of variance of general health.

**Keywords:** Personality Traits, General Health, Female Students
Network Policy Making: A Necessity for Today’s Organizations

Original Research, C5

Kamel M. Alvani S.M. and Mohammadi Moghadam Y.

ABSTRACT: The highly changeable and inconstant condition of organizational environments, including public and private sectors, needs a new strategy for the development of organizations. The purpose of this research is to introduce a new theory and framework for developing organizations in this regard. The theoretical framework is presented to determine the role of networking in organization development and to design a new strategy for this purpose. The research also presents a case study of using the theory and the results are presented. Finally, the research offers theoretical and applied suggestions in order to help organizations progress in this direction.

Keywords: Policy making, Decision making, Network structure, Social capital.
