The Relationship between Students' Academic Achievement and their Literary Ability

Dorri N. Zarei E. and Heydari H.

ABSTRACT:
This study examined the relationship between students' academic progress and their literary abilities. This was a correlational study conducted on 200 students in high school. The results showed that there is a significant correlation between students' literary abilities and their academic achievement. This means that students who have higher literary abilities tend to have better academic achievements. Therefore, it is suggested that general programs for optimizing the literary abilities of various ages should be provided.
