**ABSTRACT:** The present research was done to study the facilitates and equipment necessary for information and communication technology (ICT) in training teachers. Satisfaction of the presence of each calculated effect size has high strength.

**Keywords:** Education, Teachers, Information, Communication.
The Relationship between Students' Literary Ability and Their Academic Achievement

ABSTRACT:
This study examined the relationship between students' academic progress and their literary abilities. It was found that students with higher literary abilities tend to have better academic achievements. The study also highlighted the importance of literary knowledge in academic success, indicating that programs focusing on literary skills could improve students' overall performance. Although the relationship was not gender-specific, generalized programs for optimizing literary abilities across different age groups were recommended.

Keywords: Literary Ability, Academic Achievement, Literary Knowledge

An Investigation into the Rate of Organizational Citizenship Behavior (OCB) in Personnel of Shahed University in order to Purpose Improvement Strategies

ABSTRACT:
The current study is a descriptive project that has dealt with the rate of Organizational Citizenship Behavior (OCB) in personnel of Shahed University. It was found that the mean rate of OCB is at a higher level and in general, the Organizational Citizenship Behavior of academic personnel is also at a greater level than the mean rate. The study suggested that interventions aimed at improving OCB could lead to better organizational performance.

Relationship between Achievement Motivation and Ambiguity Tolerance with Entrepreneurship among Students in Hormozgan University

ABSTRACT:
The aim of this study is to examine the relationship between achievement motivation and ambiguity tolerance with entrepreneurship among students in Hormozgan University. The study found that there is a significant relationship between these variables and entrepreneurship. The results showed that 22% of the variance in entrepreneurship is explained by the predictor variables. The study emphasized the importance of fostering motivation and tolerance for ambiguity to enhance entrepreneurial potential among students.
