The Relationship between Literary Ability of Students and Their Academic Achievement

Dorri N. Zarei E. and Heydari H.

ABSTRACT:
This study examined the relationship between students' academic progress and their literary abilities. This was a descriptive research study that was conducted on 250 students of Shahed University in the city of Tehran. The results indicated a positive and significant relationship between the two variables. Therefore, it can be concluded that there is a direct relationship between literary ability and academic achievement. Furthermore, this study showed that the relationship may vary depending on the educational level, which is not gender specific, general programs for optimizing the literary abilities of various ages should be provided.
