The Relationship between Students' Literary Ability and Their Academic Achievement

Dorri N. Zarei E. and Heydari H.

ABSTRACT:
This study examined the relationship between students' academic progress and their literary abilities. This was a descriptive study done in many classes of the Shahed University in which the students' literary ability was measured through a test. The result showed a positive relationship between students' literary ability and their academic achievement. In other words, students who had a higher literary ability tended to have better academic achievement. Literature suggests that literary ability is not gender specific, general programs for optimizing the literary abilities of various ages should be provided.

Keywords: Literary Ability, Academic Achievement, Literary Knowledge, Comprehension

An Investigation into the Rate of Organizational Citizenship Behavior (OCB) in Personnel of Shahed University in order to Purpose Improvement Strategies

Khorshidi A. and Sadeghi S.

ABSTRACT:
The current study is a descriptive project that has dealt with rate of Organizational Citizenship Behavior (OCB) in personnel of Shahed University. The result showed that the mean rate of OCB in personnel of Shahed University is greater than the mean rate. Literature suggests that OCB is considered as an important factor for the purpose of improving the performance of personnel and their productivity. Therefore, further studies are suggested to consider the antecedents of OCB and its effect on personnel's performance.

Relationship between Achievement Motivation and Ambiguity Tolerance with Entrepreneurship among Students in Hormozgan University

Zarei E. Zainalipour H. and Shahverdi Shahraki L.

ABSTRACT:
The aim of this study is to examine the relationship between achievement motivation and ambiguity tolerance with entrepreneurship among students in Hormozgan University. The result showed that there was a significant positive relationship between achievement motivation and entrepreneurship. In other words, students who had a higher achievement motivation were more likely to have entrepreneurial intentions. The result also showed that there was a significant positive relationship between ambiguity tolerance and entrepreneurship. In other words, students who had a higher ambiguity tolerance were more likely to have entrepreneurial intentions.

In other words, 22% of variances of the entrepreneurship criterion variable are explained by the predictor variables.

Keywords: Achievement Motivation, Ambiguity Tolerance, Entrepreneurship, Students
