The Relationship between Students' Literary Ability and Their Academic Achievement

Original Research, C8
Dorri N. Zarei E. and Heydari H.

ABSTRACT:
This study examined the relationship between students' academic progress and their literary abilities. This was a descriptive-correlational study. The sample consisted of 120 students from the first and second years of Tabriz University. The study used the self-report method of the comprehensive reading test. The obtained results showed a significant relationship between students' literary abilities and their academic achievement. This relationship is not gender specific, general programs for optimizing the literary abilities of various ages should be provided.
