ABSTRACT: This study examined the relationship between students' academic progress and their literary abilities. This was a descriptive cross-sectional study. Participants were 120 students from different faculties at the University of Tehran. The study instruments included the Academic Performance Questionnaire and the Literary Ability Questionnaire. The results showed a significant positive correlation between students' literary abilities and their academic achievement. The study concluded that literary abilities are an essential factor in academic success. Therefore, educational institutions and policymakers should prioritize the development and enhancement of students' literary abilities to improve their overall academic performance. Keywords: Literary Ability, Academic Achievement, Literary Knowledge, Comprehension.

ABSTRACT: The current study is a descriptive project that has dealt with the rate of Organizational Citizenship Behavior (OCB) in the personnel of Shahed University. Participants were 120 employees from different departments. The study instruments included the Organizational Citizenship Behavior Scale. The results revealed a significant positive correlation between the rate of OCB and the personnel's work satisfaction, motivation, and productivity. The study concluded that fostering a culture of OCB in the workplace can enhance organizational performance. Keywords: Organizational Citizenship Behavior, Altruism, Conscientiousness, Sportsmanship, Courtesy, Civic Virtue, Shahed University.

ABSTRACT: The aim of this study is to examine the relationship between achievement motivation and ambiguity tolerance with entrepreneurship among students in Hormozgan University. Participants were 120 students from different faculties. The study instruments included the Achievement Motivation Questionnaire and the Ambiguity Tolerance Scale. The results showed a significant positive correlation between achievement motivation and entrepreneurship, and a significant negative correlation between ambiguity tolerance and entrepreneurship. In other words, 22% of variances of the entrepreneurship criterion variable are explained by the predictor variables. Keywords: Achievement Motivation, Ambiguity Tolerance, Entrepreneurship, Students.
