ABSTRACT: The aim of the present study is determining the...
A study on the role of Teaching Persian Conversation Program (TPCP) on the educational success of non-Persian adult speakers. Problems exist in the choice of words, sentences, methods of teaching contents, and non-colorful pictures in tablets.

The purpose of this study is to evaluate the relationship between corporate governance and accounting conservatism in cement companies in Tehran Stock Exchange (TSE). The research variables are corporate governance, accounting conservatism, management ownership, the independency of the board of directors, and the auditor's type. The method used was the correlation coefficient of Pearson.

High School Principals, Curriculum, Supervision and Guidance

Present research aims at investigating the relation between risk and stock return through evaluation of downside capital asset pricing model (DCAPM) in different time series. The method used was the linear regression model. The results were indicative of positive and significant relation between historical and future risk of the shares.

Entrepreneurship, Energy Leadership, Persistence and Perseverance

Evaluation of Entrepreneurship among Payam-e-Noor University (PNU) Academic Managers in Tehran Province. The current study is intended to enhance entrepreneurship among the academic directors of PNU. Evaluation was in terms of gender, education, employment status, technique, and executive position.

Emotional Intelligence, Personality Features, Job Satisfaction, Teachers, Junior High School

The present research was conducted to determine the relationship between Emotional Intelligence and Personality Features and job satisfaction among teachers in junior high schools. Some components of emotional intelligence and personality features can predict job satisfaction and its components.

Given intense fluctuations of Iran currency value (Rial) in recent years, we decided to study the effect of exchange rate on stock returns using the volatility model. In the case of 12 weeks interval, 18% of changes in stock price returns were shown. In the case of 24 weeks interval, 29% of changes in stock price returns were shown in the case of 24 weeks interval.

Anger, Self-confidence, Success, Volleyball player

This study is intended to examine the impact of pre-competition anger on self-confidence and success of volleyball players in Premier League and its relation with athletes' experience. The relation between top-middle ranks with middle-lower ranks was seen in subscale of self-confidence (p≤0.05; F=2.51).

At the end of financial year and has not changed their financial year during the research time. Also the companies should be enlisted in the auto regression model is an appropriate model to quote the relation between the risk and the yield of the shares.

Emotional Intelligence, Personality Features, Job Satisfaction, Teachers, Junior High School

and the statistical populations were all of the companies listed in Tehran Stock Exchange on condition that be enlisted; and not to be of investment, financial intermediary or holding nature. In order to analyze the data, the Pearson's correlation coefficient was used. The results were indicative of positive and significant relation between historical and future risk of the shares.
