ABSTRACT:
The aim of the present study is determining the relationship between profitability ratio and critical success factors in FMCG industry in stock exchange.

Keywords:
Critical Success Factors, Profitability Ratio, FMCG Industry
A study on the role of Teaching Persian Conversation Program (TPCP) on the educational success of non-Persian adult learners found that problems exist in the choice of words, sentences, methods of teaching contents, and non-colorful pictures in tablets.

The current study is intended to enhance entrepreneurship among the academic directors of Payam-E-Noor University (PNU). Entrepreneurship among gender (sex), education, employment status and technique, and executive position of managers' entrepreneurship is being evaluated.

The purpose of this study is to evaluate the relationship between the corporate governance and the accounting conservatism. Given intense fluctuations of Iran currency value (Rial) in recent years, we decided to study the effect of exchange rate fluctuations (USD) on stock returns of the manufacturing companies listed in Tehran Stock Exchange through evaluation of Downside Capital Asset Pricing Model (DCAPM) in different time series. The method used was Pearson correlation coefficient. The results were indicative of positive and significant relation between historical and future risk of return and stock returns of those companies active in Tehran Stock Exchange, during different time scales (excluding time periods 2-4).

The present research was conducted to determine the relationship between the Emotional Intelligence and Personality Features and Job Satisfaction among Teachers in Educating Institutions. Some components of emotional intelligence and personality features can predict the job satisfaction and its components. The present research was conducted to determine the prevalence of bullying/victimization and gender differences in a sample of Iranian middle school students. The study found that boys, more than girls, to bully others. And more boys than girls are being bullied or are bullying victims.
ABSTRACT: This study aimed to access the Downside Capital Asset Pricing Model at different time scales with use of wavelet analysis. The result showed that the most anticipated Downside Capital Asset Pricing Model (DCAPM) was at 16-32 day intervals.

Keywords: Downside Capital Asset Pricing Model (DCAPM), Time Scales, Wavelet Analysis, Systematic Risk.

ABSTRACT: This study examined the relationship between transformational leadership style and organizational justice in elementary school principals. The results indicated that transformational leadership and organizational justice are efficient components of training management.

Keywords: Organizational Justice, Transformational Leadership Style, Elementary School Principals.

ABSTRACT: The purpose of this research is to anticipate the quality of life based on power, family collaboration, and family functions. The regression analysis showed that family functions, collaboration, and power structure are effective variables on life styles and working women and housewives' job highly contributes to the psychological state of families.

Keywords: Quality of Life, Power Structure, Family Functions, Collaboration, Working Women and Housewives.

ABSTRACT: One part of every nation's culture, mores, and manners derives from its beliefs and thoughts. The culture of different countries, like Iran, is derived from its religion. The oldest period of Islam was very close to the Iranian culture and customs, and the early phase of the religion in Iran was very similar to the culture of Iran. In the first two centuries of the Hegira, the Muslims had a strong influence on the culture of the Arabs.

Keywords: Religion, Earliest phase of Islam, Iran, Arabs, Islamic science.
