ABSTRACT: The aim of the present study is determining the...
A study on the role of Teaching Persian Conversation Program (TPCP) on the educational success of non-Persian adult learners in Iran. The study aimed to investigate the impact of TPCP on the educational success of non-Persian adult learners.

Present research aims at investigating the relation between risk and stock return through evaluation of downside capital asset pricing model (DCAPM) in different time series. The method used was the DCAPM. The results were indicative of positive and significant relation between historical and future risk of those companies active in Tehran Stock Exchange, during different time scales (excluding time periods 2-4).

This study is intended to examine the impact of pre-competition anger on self-confidence and success of volleyball players in Premier League and its relation with athletes' experience. The results showed significant differences in subscale of self-confidence between top-middle ranks with middle-lower ranks in these teams (p≤0.05; F=2.51).

The purpose of the current research is to study the relation of the risks and yields of shares in Tehran Stock Market and the Tehran Stock Exchange. The companies should not be of investing holding and intermediary type has the date March 3rd as the end of financial year and has not changed their financial year during the research time. Also the companies should have the date June 2nd as the end of the fiscal year. The auto regression model is an appropriate model to quote the relation between the risk and the yield of the shares.

The current study is intended to enhance entrepreneurship among the academic directors of Payam-E-Noor University (PNU) in Tehran Province. The study's findings suggest that entrepreneurship is higher among gender (sex), education, employment status and technique, and executive position of managers. The main objective of this study was to determine the prevalence of bullying/victimization and gender differences in a sample of Iranian middle school students. The study found that boys, more than girls, bully others. And more boys than girls are being bullied or are bullying victims.

The main objective of this study was to determine the prevalence of bullying/victimization and gender differences in a sample of Iranian middle school students. The study found that boys, more than girls, bully others. And more boys than girls are being bullied or are bullying victims.
**An Investigation into the Adjusted Dynamic Capital Asset Pricing Model (D-CAPM) in Different Time Series Using Wavelet; a Case Study: TSE**

**Boromand E. Vakilifard H. and Talebnia GH.**

**ABSTRACT:**
This study aimed to access the Downside Capital Asset Pricing Model at different time scales with use of wavelet. The results revealed that the adjusted dynamic capital asset pricing model was evaluated. The result showed the most anticipated Downside Capital Asset Pricing Model (DCAPM) at 16-32 day intervals.

**Anticipating Quality of Life of Working Women and Housewives Based on Power Structure, Collaboration and Family Functions**

**Sadeghifard, M. Zarei E. and Rafiee, N.**

**ABSTRACT:**
The purpose of this research is to anticipate quality of life regarding power, family collaboration, and family functions. The results showed that family functions, collaboration, and power structure may significantly help to anticipate quality of life ($R^2 = 0.32$). Also, there is a significant difference between the mentioned factors in working women and housewives ($p = 0.017, t = 2.67$). The results also showed that family functions are effective variables on life styles, and women's job highly contributes on psychological state of families.

**Keywords:**
Quality of Life, Power Structure, Family Functions, Collaboration, Working Women and Housewives.
