ABSTRACT: The aim of the present study is determining the...

Keywords: Critical Success Factors, Profitability Ratio, FMCG Industry
The study on the role of Teaching Persian Conversation Program (TPCP) on the educational success of non-Persian adult learners in Iran reveals that problems exist in the choice of words, sentences, methods of teaching contents, and the non-colorful pictures in tablets.

This study is intended to examine the impact of pre-competition anger on self-confidence and success of volleyball players. The results showed that self-confidence subscale was seen in the top-middle ranks with middle-lower ranks in these teams (p≤0.05; F=2.51).

The statistical populations were all of the companies listed in Tehran Stock Exchange on the condition that they be enlisted and not to be of investment, financial intermediary or holding nature. In order to analyze the data, the present research aims at investigating the relation between risk and stock return through evaluation of downside capital asset pricing model (DCAPM) in different time series. The method used was the auto regression model, which is appropriate for the given results from ANOVA and review the high school principals' skills from Boostan and Golestan towns.

Information Management System, Human Resources, Productivity, Training

The purpose of this study is to evaluate the relationship between corporate governance and the accounting conservatism. The research aims to study the impact of corporate governance on the accounting conservatism and investigates the relationship between ownership, the independency of the board of directors, and the auditor's type and the accounting conservatism.

A study on the prevalence of bullying and victimization among middle school students in Iran reveals gender differences in the prevalence of bullying and victimization.
**An Investigation into the Adjusted Dynamic Capital Asset Pricing Model (D-CAPM) in Different Time Series Using Wavelet; a Case Study: TSE**

**ABSTRACT:**
This study aimed to access the Downside Capital Asset Pricing Model at different time scales with use of wavelet analysis. For this purpose, Wavelet Transform was evaluated. The result showed most anticipated Downside Capital Asset Pricing Model (DCAPM) at 16-32 day intervals.

**Keywords:** Downside Capital Asset Pricing Model (DCAPM), Time Scales, Wavelet Analysis, Systematic Risk
