Emotional Intelligence, Personality Features, Job Satisfaction, Teachers, Junior High School

Systematic Risk, Stock Return, DCAPM, Time series, Tehran stock exchange

The current study is intended to enhance entrepreneurship among the academic directors of Payam-E-Noor University (PNU) in Tehran province. The study focuses on examining the relationship between entrepreneurship and factors such as gender, education, employment status, and technical and executive position of managers.

Entrepreneurship, Energy Leadership, Persistence and Perseverance

The statistical populations were all of the companies listed in Tehran Stock Exchange on the condition that they were active in the stock market, were not investment, financial intermediary, or holding companies. To analyze the data, one of the most important goals in any organization is increasing workforce productivity. Information systems, Systems, Training

The purpose of this study is to evaluate the relationship between the corporate governance and the accounting conservatism. The study examines the role of ownership, the independency of the board of directors, and the auditor's type in the accounting conservatism.

Present research aims at investigating the relation between risk and stock return through evaluation of downside capital asset pricing model (DCAPM) in different time series. The method used was to analyze the data over different time periods, excluding certain intervals.

The present research was conducted to determine the relationship between the Emotional Intelligence and Personality Features with job satisfaction status of male junior high school teachers in Islamshahr City. The study suggests that some components of emotional intelligence and personality features can predict job satisfaction.

The main objective of this study was to determine the prevalence of bullying/victimization and gender differences in those incidents. The study found that boys, more than girls, tend to bully others. Additionally, more boys than girls experience bullying or being bullied.

The Role of Religion in Dominance of Iranian Culture and Customs in Arabic and Islamic Culture at the First Two Centuries of Hejira

Dorri, N.

ABSTRACT: One part of every nation's culture, mores and manners derives from its beliefs and thoughts. The culture of different nations is different depending on their beliefs, thoughts, and surroundings. Despite the fact that Islam is the religion of all Muslims and the Arabs; however, the Arabs were interested in saints of Shia because it had a close relation with their historical thoughts and principle beliefs.
