The Role of Religion in Dominance of Iranian Culture and Customs in Arabic and Islamic Culture at the First Two Centuries of Hejira

Original Research, C27
Dorri, N.

ABSTRACT:
One part of every nation's culture, mores and manners derives from its beliefs and thoughts. The culture of different community groups have different roots. Among the Persian nation, whose history is long and different from other nation, the role of religion has been important in cultural development. While the concept of Islamic religion is related to Islam, the concept of religion in this paper is used as a broader concept and means the belief system and customs of society and culture. The research results showed that the dominant religion of the society is one of the main factors that affect the development of cultural customs of society. Besides, the research results showed that Iranian culture and customs have a significant difference compared to the Arabic culture and customs.
