Original Research, C11

Daneshvar A. Hasanpour E. and Rahgozar H.

ABSTRACT: The aim of the present study is determining the relationship between profitability ratio and critical success factors in active companies in FMCG industry of Tehran Stock Exchange.

Keywords: Critical Success Factors, Profitability Ratio, FMCG Industry.
This study is intended to examine the impact of pre-competition anger on self-confidence and success of volleyball players. A significant difference was observed in the subscale of self-confidence between top-middle ranks and middle-lower ranks in these teams ($p \leq 0.05; F=2.51$).

The main objective of this study was to determine the prevalence of bullying/victimization and gender differences in these phenomena among Iranian middle school students. The findings revealed that boys, more than girls, bully others. Moreover, more boys than girls are bullied or are bullying victims.

The purpose of the current research is to study the relationship between the risks and yields of shares in the Tehran Stock Market and the Yield Model. The study was conducted on all the companies listed in the Tehran Stock Exchange, excluding those that are of investment, financial intermediary or holding nature. The auto-regression model was found to be an appropriate model to estimate the relation between the risk and the yield of the shares.
