The Effects of Anger Management Skills Training on Aggression, Social Adjustment, and Mental Health of College Students

Entesar Foumany GH. and Salehi J.

ABSTRACT: Anger is a sign that evokes aggressive behavior. It can cause emotional, psychological, or physical harm to oneself and others. Aggressive behavior impacts social standing and mental health. All these improvements are attributable to reductions in aggressive behaviors due to education.

This study was performed to determine social-cultural polygamy-related factors. This is a descriptive-correlational study that explores the relationship between polygamy and educational, social, and cultural factors. The results showed that there is a negative relation between internet addiction and openness communication, intra-generation communication, and social support. Furthermore, the individuals' responses showed that sexual beliefs are effective as a subjective factor.
