The Effects of Anger Management Skills Training on Aggression, Social Adjustment, and Mental Health of College Students

Original Research, C28

Entesar Foumany GH and Salehi J.

ABSTRACT: Anger is a sign that evokes aggressive behavior. Aggression can cause emotional, psychological or physical damage to people. Mental health is one of the important factors determining the quality of human life. This study was conducted to evaluate the effects of anger management skills training on aggression, social adjustment, and mental health of college students. The findings of this research show that the improvement of anger management skills leads to reduction in aggressive behaviors. The research also shows that anger management skills training improves social adjustment and mental health. All these improvements are attributable to reductions in their aggressive behaviors due to educations.

**ABSTRACT:**

Using Cross Efficiency with Symmetric Weights for the Method DEAHP

Data Envelopment Analysis (DEA) is a useful tool to measure and recognize the effectiveness and performance of different decision-making units (DMUs). Generally, the efficiency of DMUs is calculated by comparing their input and output. However, in existing models, the weight of inputs and outputs is assigned to each DMU and is different from one DMU to another. Therefore, in the current research we use the symmetric weights for a more logical choice of criteria and options.

### A Study of the Influence of Institutional Ownership on Growth Opportunities and Dividend Policies

**Bahadori M. Abdoli MR. and Taleb Nia G.**

**ABSTRACT:**

The purpose of this research is to study the relationship between institutional ownership and growth opportunities and dividend policies. The results showed that there is a significant relation between institutional ownership and growth opportunities and dividend policies.

### A Study of Effective Factors on the Decrease of Tax Assertiveness and Tax Diagnostic Difference in Tehran Stock Exchange

**Layeghifar S. Abdoli MR. and Armin A.**

**ABSTRACT:**

This study aims to investigate the effect of cooperative learning on the confidence. This Study was a quasi-experimental study and was implemented in two groups of girls and boys, with 100 girls and 100 boys in each group. The test results showed that the mean score of confidence in the girls test group significantly. Therefore, cooperative learning increases the confidence in girls more than boys.

### Study of Cultural – Social Factors Associated with Polygamy in the Bastak City, Iran

**Heydari H. Zarei E. and Zainalipour H.**

**ABSTRACT:**

This study was performed to determine social-cultural polygamy-related factors. This is a descriptive-correlational study and was implemented on a sample of 420 families. The results showed that sexual beliefs are effective as a subjective factor.

### Study of Cultural Factors, Social Factors, Polygamy

**ABSTRACT:**

Forecasted earnings provide significant information for investment and other financial statements users. In recent years, the factors affecting the earnings forecast accuracy were studied, however, research on the factors affecting earnings forecast accuracy have been done in different fields. Therefore, this research focused on the factors affecting earnings forecast accuracy and the study of these factors in the field of investment in the securities market was important. The results showed that there is a negative relation between internet addiction and openness communication, intra-generation communication, lack of family consolidation, and family consolidation. Internet addiction is associated with the ultra-use internet and requires more researches about family consolidation and child-parent relations improvement.
