**The Investigation of the Structural Relationship between Perception of Class and Psychological Basic Needs of University Students and their Academic Engagement**

**Original Research, D3**

Asadian MH., Kavosian J., Bagi A., Hashami K., Arabzadeh M. and Hoseinpour M.

ABSTRACT: The study present a model to describe structural relations between psychological scores and academic performance. The comparison of two methods of maximum likelihood (ML) and diagonally weighted least squares (DWLS) were shown with regard to the significance of the results. The comparison of two methods of ML and DWLS in testing construct validity of achievement goals was significant (but low) and between psychological basic needs and academic performance was significant considerably.

Keywords: Psychology, Cognitive, Affective and Behavioral

The Comparison of Two Methods of Maximum Likelihood (ML) and Diagonally Weighted Least Squares

Original Research, D4

Baghdarnia M., Firozy Soreh R. and Gorji R.

ABSTRACT: The present essay was intended to compare between two methods of estimation, namely, Maximum Likelihood (ML) and Diagonally Weighted Least Square (DWLS). Despite being one of the most common methods for model estimation, ML estimation adapts default estimation method (ML) so the results may be biased and this may lead to making the erroneous decisions.

Keywords: Estimation Methods, Maximum Likelihood, Diagonally Weighted Least Square (DWLS), Construct Validity, Achievement Goals
