ABSTRACT:
So far legislators from several countries have proposed many definitions for cyber-crime, but they have not yet achieved a comprehensive understanding of the phenomenon. This study aims to focus on the criminalization of cyber-crimes, particularly those related to computer content, in cyberspace.

Key words: Computer-related Crimes, Criminalization, Information and Communication Technology (ICT), Criminal Content-Cyber Crimes, Cyberspace, Content-related Crime

Study of Rumination and Locus of Control Roles in Depression of Female Employees of the University of Medical Sciences, Rasht, Iran

Original Research, C51

Mohammadi K., Zarei E., Chaleshgar M.

ABSTRACT:
Depression is a phenomenon that is considered one of the most complicated issues of mental health in today's world. This study aims to explore the roles of rumination and locus of control in the depression of female employees. The results showed a positive and significant relationship between rumination and external locus of control.

Key words: Rumination, Locus of control, Depression, Female employees.
The current study is intended to investigate into the impact of Information and Communication Technology (ICT) on learning styles in students at post-test stage. Thus, it may be concluded that one can modify students' learning styles by means of ICT.

The objective of this research is to study the relationship between accounting conservatism and capital structure of companies registered with the Tehran Stock Exchange. The study is conducted using the Altman model to predict the probability of bankruptcy and the ratio of debt to equity and debt to total assets as two measures of capital structure. The results show that there is a reversed relationship between accounting conservatism and bankruptcy risk of the companies under study.

The current study is generally intended to study on role of 5S system in learning enrichment of girls' high schools from the perspective of students. The present study analyzes 5S system and its implementation in schools and recommends that the schools should focus on the first three steps (Sort, Standardization, Set) of 5S system to improve learning environment.
