Attachment Patterns as Predictors of Conduct Disorder in 9-11-Year-Old Students in Bandar Abbas City, Iran

Mahmoodi, M. Zarei, E. and Askarii, M.

ABSTRACT:
This research was aimed at studying the relationship between attachment patterns and conduct disorder. The research was conducted based on the correlational method and the research samples were 100 students from grade 5 of the elementary schools of Bandar Abbas City. The research data were gathered by the Attachment Style Scale and the Conduct Disorder Scale. The obtained data were analyzed using the Pearson correlation coefficient. The results showed a significant positive correlation between attachment patterns and conduct disorder. The analysis of the results showed that the strangers pattern had the highest and the secure and then the avoiding patterns had the list prediction power in conduct disorder.

Key words: Conduct Disorder, Attachment Patterns, Students

The Effectiveness of Life Skills Training on Achievement Motivation and Life Satisfaction of Students

Lak, Z. Rajabi, S. Moazedian, A. Pournikdast, S. and Sabetimani, M.

ABSTRACT:
Since a considerable part of students' lives are spent at school, a huge contribution is made by the schools to education. The aim of the present study was to investigate the effect of life skills training on the achievement motivation and life satisfaction of students. The sample of this research consisted of 100 male and female students of the 10 grade of the elementary schools of Zanjan City. The research was conducted based on the pre-test-post-test control group method. The obtained data were analyzed using the t-test. The results showed a significant increase in the achievement motivation and life satisfaction of the students in the experimental group after the training compared to the control group.
