Assessing the Effects of Auditing Institutions' Size and Type of Auditors' Opinion on Auditing Institutions' Rotation

Original Research, D28

Abdoli M. Mahmoudzadeh A. and Darvishan M.

ABSTRACT: Nowadays, not only in academic areas but also among the ordinary people and organizations, auditors' independency is regarded as a significant factor in maintaining the public's trust in the audit results. Therefore, the aim of this study is to assess the effects of auditing institutions' size and type of auditors' opinion on auditing institutions' rotation. The results show that auditing institutions' size and type of auditors' opinion are not significantly associated with auditing institutions' rotation.
This research is aimed at investigating the impact of synthetics model of teaching on creative writing of fifth grade boy students. The study was conducted in two groups, synthetic model and control group. The results showed that the synthetic model of teaching was effective on enhancing creativity. Analysis of variance indicated a significant difference between the two groups and the research hypothesis was verified.
