Assessing the Effects of Auditing Institutions’ Size and Type of Auditors’ Opinion on Auditing Institutions’ Rotation

Original Research, D28

Abdoli M. Mahmoudzadeh A. and Darvishan M.

ABSTRACT: Nowadays, not only in academic areas but also among the ordinary people and organizations, auditors’ independency is a crucial point of view. In this study, the correlation between the size of auditing institutions, the type of auditors’ opinion, and the rotation of auditing institutions is investigated. The results showed that the difference in the size of auditing institutions and the type of auditors’ opinion are not significantly associated with auditing institutions’ rotation.
The purpose of this research is to examine the relationship between audit fees and board compensation while controlling for Tehran Stock Exchange. A significant positive relationship was observed between cumulative stock returns and board compensation.

The aim of this paper is to examine the causality relationship between foreign direct investment, Exports and economic growth in developing countries. The panel indicates a unidirectional causality from GDP to FDI and bidirectional causality between GDP and export.

This research evaluated the relationship of return with Free Cash Flow (FCF) and earning before and after restatement of financial statements. A decrease in the power of information is decreased which in turn results in the decrease of the financial statements' reliability.

This study investigates the relationship between self-efficacy and psychological well-being components. It also examines the effect of REBT on decreasing depression and anxiety of women living in Qom. Based on the results, REBT significantly reduced these variables.

The present research discusses earnings management of managers using restatement of income numbers to know whether restatement numbers accounted for earnings management up to 95 percent and managers gain through restatement of income numbers.

The present research discusses earnings management of managers using restatement of income numbers to know whether restatement numbers accounted for earnings management up to 95 percent and managers gain through restatement of income numbers.

This research evaluated the relationship of return with Free Cash Flow and earning before and after restatement of financial statements; case study. In this research has not any significant effect on earning quality of listed companies in Tehran Stock Exchange.

The present research discusses earnings management of managers using restatement of income numbers to know whether restatement numbers accounted for earnings management up to 95 percent and managers gain through restatement of income numbers.
