ABSTRACT: Nowadays, not only in academic areas but also among the ordinary people and organizations, auditors' independency is an important issue. The purpose of this paper is to assess the effects of auditing institutions' size and type of auditors' opinion on auditing institutions' rotation. It is expected that auditing institutions' size and the type of auditors' opinion are significantly associated with auditing institutions' rotation. However, the results of the analysis show that auditors' independency is not influenced by the size of auditing institutions or their type of auditors' opinion. The results also indicate that auditing institutions' rotation is not significantly associated with auditors' independency. The implications of the findings are discussed, and suggestions for future research are provided.

Keywords: Auditing Institution’s Rotation, The Type of Auditors’ Opinion, Auditors’ Independency.
The purpose of this research is to examine the relationship between audit fees and board compensation while controlling for other factors. ABSTRACT: The purpose of this study is to investigate the effect of corporate governance mechanism on information content of operations (unprofitable compared to profitable companies). To do so, the impact of variables such as Institutional Investors, The Non-duty Managers in the Board of Directors, Free Float Stock and The Use of Debt in Financing on Stock returns of both unprofitable and profitable companies was studied. Statistical sample includes 13 companies, between the years of 2007 to 2012. This study "combinational data" method was used in order to test considered theories. Study results shows that there is a meaningful relation between nominative stockholders percent of property and stock returns in bad companies. In addition, there is also a positive relation between unbound managers in board of directors and Stock returns, which its impact is more in bad companies. Moreover, there is a meaningful relevance between floating stock and stock returns in both profitable and bad companies but it has a stronger effect on the former one. Finally, there is a negative relationship between the Use of debt to financial feasibility and stock yield in bad companies. However, no relation was found in profitable companies.
