The current study has as its objective to analyze the relationship between family functioning and ego resiliency with general health in women suffering from cancer. It can be concluded that cases with higher ego resiliency enjoy better general health levels.

Debate about the value of providing corrective feedback on L2 Writing has been outstanding in recent years. Truscott argues that Iranian low proficiency student writers prefer the clarity of evaluative feedback which directly addresses their errors.

This survey is an effort to realize the relationship between job satisfaction and marital satisfaction among teachers. It has been observed that higher record of services equal to more job satisfaction. Other hypothesis have been rejected.

The purpose of this study was to investigate the relationship between family communication patterns and satisfaction with life among students. Based on the findings, it can be concluded that conversation plays a key role in students' life satisfaction.

The aim of this study was to investigate the relationship between the components of emotional intelligence and addiction behavior in students. It has been observed that there is less likely to be caught in this trap. And it makes clearer the need of students to participate in group work.

The anxiety for EFL learners that accompanies the listening comprehension (LC) task is difficult to detect, but it is correlated negatively with the anxiety level. The result shows anxiety and listening comprehension in English are correlated negatively.

In present century, commercial competitive market transforms to a competitive market between the brands. The brands spare no effort to attract the consumers. Many factors affect interpersonal attractions. According to Social psychological studies, pleasant and unpleasant odors have different influences. The present research supports the above hypothesis. Pleasant odors have more influence on women, but the effects of unpleasant odors are the same for both sexes.
ABSTRACT:
Economic institutions mostly hold their assets in the cash accounts. The present study mainly aims to assess the ... flow. The results also showed that fiscal restraints are not significantly influential in cash flow sensitivity of cash.

Keywords:
Asymmetric cash flow, Fiscal constraint, sensitivity of cash

ABSTRACT:
The purpose of this study is to investigate the effect of corporate governance mechanism on information content of operations (unprofitable compared to profitable companies). To do so, the impact of variables such as Institutional Investors, The Non-duty Managers in the Board of Directors, Free Float Stock and The Use of Debt in Financing on Stock returns of both unprofitable and profitable companies was studied. Statistical sample includes 13 companies, between the years of 2007 to 2012. This study used a combinational data method in order to test considered theories. Study results show that there is a meaningful relation between nominative stockholders percent of property and stock returns in bad companies. In addition, there is also a positive relation between unbound managers in board of directors and Stock returns, which its impact is more in bad companies. Moreover, there is a meaningful relevance between floating stock and stock returns in both profitable and bad companies but it has a stronger effect on the former one. Finally, there is a negative relation between the use of debt to financial feasibility and stock yield in bad companies. However, no relation was found in profitable companies.

Keywords:
Corporate Governance, Debt Financing, Institutional Investors, Non-duty Managers, Stock returns.
