The Comparative Analysis on Mathematical Achievement, Self-efficacy, and Self-concept Based on the Perceived Classroom Climate

Original Research, D60

Kakojoibari, A. and Sharifi Saki, Sh.

Abstract:
The current study is aimed at conducting a comparative analysis on mathematical achievement, self-efficacy, and self-concept based on the perceived classroom climate. The study involved a sample of students from different schools, and the data was collected through a standardized test and a self-efficacy questionnaire. The results showed a significant difference in mathematical achievement between the groups, with students from schools with a positive classroom climate scoring higher. A route analysis showed that this difference is adjustable by the self-efficacy of the students.

Keywords:
