Zakery, J. Makari, R. Pir Cheraghi, A. and Zahedi, O.

ABSTRACT: The target of the current study is to assess the relationship between religious beliefs & optimism and moral health of students. The variables included in the study are religious beliefs, optimism, and moral health. The study finds that the variables of religious beliefs and optimism, respectively, were the factors of forecasting the moral health.

Keywords: Religious beliefs, Optimism, Moral health

Investigating the Impact of Restated Financial Statements on Persistence of Financial Performance

Original Research, D71
Khatibzadeh, P. Abdoli, M. and Dehdar. F.

ABSTRACT: The present research investigates the relationship between restated accounting figures and persistence of financial performance. The study argues that restated financial statements lead to a lower persistence of financial performance. This finding is supported by increasing research on earnings management and intellectual capital. The results indicate that restatement increases, while increasing financial leverage results in reduction of the persistence of financial performance.

Keywords: Restated Financial Statement, Persistence of Financial Performance

Earnings Management and Intellectual Capital

Original Research, D72

Galdipour, S. Rahimiyan, F. Etemad, A. and Panahi, H.
ABSTRACT: The present study aims to investigate the relationship between intellectual capital, its development, and earnings management in the context of Indonesian companies. Using a modified Jones model, discretionary accruals were applied as the criterion for determining earnings management. The study found a significant relationship between intellectual capital and earnings management but no significant relationship between intellectual capital and intellectual capital development.

Keywords: Intellectual Capital, Intellectual Capital Development

Internet and Social Development in Teens

Original Research, D75
Aslani, N.

ABSTRACT: The basic objective of the present study is rev...
ABSTRACT: The purpose of the present study is to investigate the effect of the Philosophy for Children program (p4c) on reducing trait anger in teenagers.
The main question in this research was the identification of core competencies in the field of elementary education. This is important because a Competency-based curriculum in the field of primary education, regardless of the set of core competencies, will have the desired effectiveness to train professionals needed to improve education.
