Keywords: Individualized Instruction, CAI
The current study is aimed at conducting a comparative analysis on mathematical achievement, self-efficacy, and self-concept based on perceived classroom climate. The analysis revealed that differences in these variables are adjustable by some factors, such as mathematical self-efficacy. Further research is recommended to understand the underlying mechanisms of these differences.

Keywords: Religious beliefs, Optimism, Moral health

Investigating the Impact of Restated Financial Statements on Persistence of Financial Performance

Original Research, D71
Khatibzadeh, P. Abdoli, M. and Dehdar. F.

ABSTRACT: The present research investigates the relationship between the restated accounting figures and persistence of financial performance. Specifically, the study examines how restating accounting figures affects the persistence of financial performance over a period of time. The research findings indicate that restating financial figures can lead to a higher degree of persistence in financial performance. This is because restated figures allow for a more accurate representation of the company's financial position and performance, thereby reducing the variability and unpredictability of financial outcomes. The study also reveals that different restatement factors can有不同的influence on the persistence of financial performance. For instance, non-recurring income increases, while increasing financial leverage results in reduction of the persistence of financial performance.

Keywords: Restated Financial Statement, Persistence of Financial Performance
