Comparing Anger Management, Anger Dimensions, and Quality of Life in Methadone Maintenance Treatment Addicts and Non Addicts

Original Research, D64

Tabatabae, S.M. Moazedian, A. and Noori, H.

ABSTRACT: The purpose of present research is "The Compari... addict males and also non addict males regarding anger control and quality of life addict males and non-addict males.

Keywords: Anger Control, Anger Dimension, Quality of Life
Identifying the Effective Factors on Achievement of Smart Schools by Review of the Status Quo and Problems in Smarts Schools

Original Research, D65
Mirsaidi, G. and Yaghoubi, M.

ABSTRACT: The current investigation is intended to identify the effective factors on achievement in Smart Schools via study on the status quo and problems in Smart Schools. The results indicated that instructional factors and software and digital factors are not in suitable conditions and also environmental factors are at average level.

Keywords: Smart Schools, Evaluation, Information Technology
ABSTRACT: The purpose of the present study is examination of the impact of the program “philosophy for children” (p4c) on foster self-esteem in adolescents and its four components namely; general self-esteem, family self-esteem, social self-esteem and education self-esteem.

Keywords: Self-esteem, Philosophy for Children, Investigation Ring
An Examination into the Elementary Schools Teachers’ Viewpoint on the Role of Assistant Principal

Original Research, D67
Mahdavi, N.

ABSTRACT: The present research has employed a qualitative approach with phenomenological method to assess the viewpoint of teachers on the role of assistant principal within the enacted curriculum. The results indicate that the assistant principal plays a pivotal role in facilitating the implementation of innovative teaching methods and discouraging the use of traditional methods. Factors such as the assistant principal’s support, the school’s administration, and the available resources are influential in encouraging teachers to adopt new practices. Further research is needed to explore the impact of these factors on the overall educational outcomes.

Keywords: Enacted Curriculum, Role, Viewpoint, Assistant Principal
ABSTRACT: The main purpose of this research is to survey the relationship between social capital, knowledge management, and organizational intelligence in tax affairs organizations of Tehran. The study uses structural equation modeling to analyze the impact of social capital and knowledge management components, such as learning organization, relative and recognitive capital, on organizational intelligence.

Keywords: Social capital, Knowledge management, Organizational intelligence

The Relationship between Religious Beliefs, Optimism and Moral Health of the University Students

Original Research, D70

Zakery, J. Makari, R. Pir Cheraghi, A. and Zahedi, O.

ABSTRACT: The target of the current study is to assess the relationship between religious beliefs and optimism and moral health.

Keywords: Religious beliefs, Optimism, Moral health

Investigating the Impact of Restated Financial Statements on Persistence of Financial Performance

Original Research, D71
Khatibzadeh, P. Abdoli, M. and Dehdar, F.

ABSTRACT: The present research investigates the relationship between the restated accounting figures and persistence of financial performance. The study findings indicate that restated financial statements lead to decreased persistence in financial performance. Furthermore, an increase in financial leverage is associated with a reduction in financial performance persistence.

Keywords: Restated Financial Statement, Persistence of Financial Performance

Earnings Management and Intellectual Capital

Original Research, D72

Galdipour, S., Rahimiyan, F., Etemad, A., and Panahi, H.
ABSTRACT: The present study aims to investigate the relationship between intellectual capital, its development and earnings management. Using the modified Jones model, discretionary accruals were applied as the criterion for determining earnings management. The study found no significant relationship between intellectual capital and earnings management, but there is no significant relationship between intellectual capital and intellectual capital development.

Keywords: Intellectual Capital, Intellectual Capital Development

Educational Services Quality Analysis

Keywords: Educational service; Student University; Quality

Performance Measurement based on the Created Value Added by using the Balanced Scorecard

ABSTRACT: The purpose of this study was to determine gaps in perceptions and expectations of students in University of Tehran using service quality, thus it should be attempted to eliminate or mitigate gaps in current and optimal statuses.

Keywords: Educational service; Student University; Quality

Performance Measurement based on the Created Value Added by using the Balanced Scorecard
ABSTRACT: There are various methods developed for the performance evaluation. Most of the measurement models employ scoring systems to rate the performance of an organization. However, in project-based organizations, the role of each department is critical in creating value added. Therefore, Balanced Scorecard and brainstorm methods are used to determine the role of each department in creating value added.

Keywords: Performance Evaluation, Value Added, Balanced Scorecard

Internet and Social Development in Teens

Original Research, D75
Aslani, N.

ABSTRACT: The basic objective of the present study is review the role of using of the internet on Social growth of guidance school students. The study was conducted in a guidance school in order to compare the compatibility and the spirit of cooperation and collaboration But the rise of Internet use time is reduced compatibility.
Investigate the Effect the Philosophy for Children program (p4c) on Reducing Trait Anger in Teens

Original Research, D76
Tajali Nia, A.

ABSTRACT:
The purpose of the present study is investigating...
The main question in this research was the identification of core competencies in the field of elementary education. The concept of core competencies has been utilized as a basis for designing the Competencies-based curriculum in the field of primary education, regardless of the set of core competencies. This study examines the relationship among Field dependence-Independence (FDI) cognitive styles and mathematics achievement. Data analysis done by regression analysis indicates that FDI cognitive style interprets 8.8% of the variance in mathematics achievement.

The general objective of this study is to compare the critical thinking of elementary school, guidance and high school principals in the field of analysis. There are significant differences in critical thinking among elementary and high school principals. The findings underline the importance of critical thinking strategies for improving the educational effectiveness of schools.

The purpose of this research was to discover the prediction of divorce between Zanjan couples based on mental disorders and demographic characteristics. The findings underline the importance of mental disorders and demographic characteristics in divorce. Engagement in mathematics should be expected of all students, and the learning environment should be one where students have the requisite prior knowledge, the curriculum is relevant to them, the classroom tasks interest them, and they have the requisite prior knowledge.

The effect of Information Asymmetry on the cost of Equity Capital in listed companies on the Tehran Stock Exchange was examined. The findings indicate that Information Asymmetry has a significant effect on the cost of Equity Capital.

The effect of Mindfulness training and Behavioral Drug Reduction Counseling on the reduction of drug relapse was examined. The findings suggest that Mindfulness training and Behavioral Drug Reduction Counseling are effective in reducing drug relapse.

Growing demands in finding new strategies to maximize organizational effectiveness have resulted in the increased interest in psychological capital. The current research is intended to examine the relationship between psychological capital with perceived organizational support, job satisfaction, and affective commitment. The findings underline the importance of psychological capital in organizational effectiveness.

The purpose of this study is to examine the relationship between some contextual variables and mathematics achievement. Results from TIMSS 2007 are used to explore this relationship. The study finds that interclass comparisons of the association between some contextual variables and mathematics achievement are significant.
