ABSTRACT:
The target of the current study is to assess the relationship between religious beliefs and optimism and moral health of individuals.

Keywords:
Religious beliefs, Optimism, Moral health

Investigating the Impact of Restated Financial Statements on Persistence of Financial Performance

Original Research, D71
Khatibzadeh, P. Abdoli, M. and Dehdar. F.

ABSTRACT: The present research investigates the relationship between the restated accounting figures and the persistence of financial performance. Restated financial statements, which are inaccuracies due to human error, are used to calculate financial statements. These inaccuracies can cause misrepresentation of financial performance and firm characteristics, which in turn can lead to a decrease in the actual persistence of financial performance. While increasing financial leverage leads to a decrease in the persistence of financial performance, increasing financial leverage results in an increase in the persistence of financial performance.

Keywords: Restated Financial Statement, Persistence of Financial Performance

Earnings Management and Intellectual Capital

Original Research, D72

Galdipour, S., Rahimiyan, F., Etemad, A., and Panahi, H.
ABSTRACT: The present study aims to investigate the relationship between intellectual capital, its development and earnings management. Using the modified Jones model, discretionary accruals were applied as the criterion for determining earnings management. The results indicate that there is a significant relationship between intellectual capital and earnings management. However, there is no significant relationship between intellectual capital development and earnings management.

Keywords: Intellectual Capital, Intellectual Capital Development

Educational Services Quality Analysis
Original Research, D73

Study shows that the appropriate time of internet usage increases the compatibility and the spirit of cooperation and collaboration. But the rise of Internet use time is reduced compatibility.
Investigate the Effect the Philosophy for Children program (p4c) on Reducing Trait Anger in Teens

Original Research, D76
Tajali Nia, A.

ABSTRACT: The purpose of the present study is investigating...
This research aims to evaluate the optimum portfolio selection using the Particle Swarm algorithm. For this purpose, the Particle Swarm algorithm is applied to solve the Markowitz Model and the Mean-Variance Model. The study concludes that in problems with complexity and size increases, the Particle Swarm algorithm performs better than the traditional methods.

The main question in this research was the identification of core competencies in the field of elementary education in Iran. Competencies-based curriculum in the field of primary education, regardless of the set of core competencies, will have the requisite prior knowledge, the curriculum is relevant to them, the classroom tasks interest them, and the student achievement will be higher.

The goals of this study were to investigate the relationships between mathematics achievement and some contextual factors. The study showed that the school level accounts for a significant amount of variability of student mathematics achievement.

The present study aimed to assess the relationship between information asymmetry and the cost of equity capital in listed companies. The study found that the hypothesis cannot be confirmed in case of utilizing control variables.

The general objective of this study is to compare the critical thinking of elementary school principals with that of high school principals in the field of analysis. The study concluded that there are significant differences in critical thinking among elementary and high school principals in the field of analysis.
