Measures Taken by Iran to Prevent Transnational Organized Crimes and its Estimated Position Compared to the UN Criminal Policy

Abstract:
Transnational Organized crimes are being considered as one of the most important problems of the 21st century. These crimes have a tremendous impact on global and national economies. Among the challenges facing the global community today is to seek effective measures to prevent and control these crimes. However, no particular prevention has been done and no independent body of strategies has been designated. So, in order to exit from this situation, different prevention strategies such as pastoral and social preventions have been set each of which has some limitations. The aim of the present study is to investigate Iran's strategies for fighting Transnational Organized Crimes and its position compared to the similar UN conventions (Palermo and Merida).

Keywords: Prevention, Transnational Organized Crimes, Criminal Policy, Position of Iranian government.
The high volume of accounting scandals in recent years has led to a loss of public trust in corporations and organizations. These scandals not only damage the reputation and values of companies but also negatively impact their market positions.
