Measures Taken by Iran to Prevent Transnational Organized Crimes and its Estimated Position Compared to the UN Criminal Policy

ABSTRACT:
Transnational Organized crimes are being considered as one of the most important problems of the 21st century. These crimes are being considered as a kind of transnational crime that is a type of organized crime. In the field of organized crime, there is no particular prevention has been done and no independent body of strategies has been designated. So, in order to exit from this situation, different prevention strategies such as pastoral and social preventions have been set each of which has its own characteristics. As a result, not just the crime is completely allowed to be prevented, but the efforts have been made to lower the range of crime by using the above strategies. In Iran, the government has made different interventions to prevent such crimes. In this regard, the government of Iran has taken measures against Transnational Organized Crimes and UN conventions (Palermo and Merida). Therefore, it is necessary for the Iranian government to increase measures against such crimes and to create an independent body of strategies in this regard.
