ABSTRACT: Transnational Organized crimes are being considered as one of the most important problems of the 21st century. These crimes have positive and negative impacts on the global society and economy. As an instance, the Iran is one of the major centers of drug trafficking. The government of Iran has taken different measures against Transnational Organized Crimes and its position in comparison to the UN Criminal Policy is explained in this research. The strategies of pastoral and social prevention were set to prevent the occurrence of Transnational Organized Crimes from the root. The position of Iran in this regard is higher than other member countries of UN,

Keywords: Prevention, Transnational Organized Crimes, Criminal Policy, Position of Iranian government.
The purpose of the present study was to compare resiliency, styles of coping with stress, alexithymia and fear of negative evaluation between primary progressive and progressive-relapsing group patients. The primary progressive group scored higher in emotion-oriented coping style compared to primary progressive and progressive-relapsing group patients.
