Measures Taken by Iran to Prevent Transnational Organized Crimes and its Estimated Position Compared to the UN Criminal Policy

ABSTRACT: Transnational Organized crimes are being considered as one of the most important problems of the 21st century. These crimes are caused by criminal groups who come from different countries and work by crossing borders. In the current research, the reasons behind the increase in transnational crimes are investigated. Also the measures taken by the government of Iran against Transnational Organized Crimes are evaluated and compared to the conventions of the United Nations about crime prevention in order to find the best strategies. The study results show that even though Iran has signed the Palermo treaty, it has not done any particular prevention. Therefore, the government should pay more attention to this topic and take care of it.

Keywords: Prevention, Transnational Organized Crimes, Criminal Policy, Position of Iranian government.
With the quickly widespread availability of computers and information technology and advanced media, no country can afford to make decisions without the involvement of these systems. And there was no evidence to reject the mentioned fourfold hypothesis.

According to direct tax code, financial statements should be prepared based on Generally Accepted Accounting Principles (GAAP). In other words, the results of hypotheses show markedly the role of distortions in tax evasion. The aim of this research is to discuss the effect of education of philosophy upon creativity of students for children, reviewed for the validity of the hypothesis in the first group. The findings are confirmed by validity and creditably for children that is an extension and innovation.

The right flow of information at this market leads to make the accurate and reasonable decision from the participants. But there is not a significant relation between auditing firm size with restatement of financial statements. Computer games as an emerging phenomenon have encompassed extensive aspects of children's life that social skills would decrease. This study illustrates that with increased DPCG, the children's social skills would decrease.
