Identifying the Drivers of Green Supply Chain Management in Tile Industry using Delphi Technique

RostamiFard M, Shekari H, Eslami S.

ABSTRACT:
Supply chain management used to be widely understood as an integrated one-way manufacturing process, in which the raw materials went through the production line and were finally delivered to the customer. However, the concept of supply chain management has changed in recent years due to the increasing environmental awareness. The present study showed that forty measurement items affect the GSCM in Tile industry. Finally these measurement items were ranked.
