Identifying the Drivers of Green Supply Chain Management in Tile Industry using Delphi Technique
Original Research, D140
RostamiFard M, Shekari H, Eslami S.
ABSTRACT: Supply chain management used to be widely understood as an integrated one-way manufacturing process, in which the raw materials flow through the production chain from the raw material suppliers to the final customers. In the recent years, Green Supply Chain Management (GSCM) has been put forward as an approach to environmentally conscious business. This study aimed at identifying the drivers of green supply chain management in the tile industry in Iran. A total of 60 experts were selected from different industries and they were asked to participate in this study. The findings showed that forty measurement items affect the GSCM in Tile industry. Finally these measurement items were ranked.
