Identifying the Drivers of Green Supply Chain Management in the Tile Industry using Delphi Technique

Original Research, D140
Rostami Fard M, Shekari H, Eslami S.

ABSTRACT:
Supply chain management used to be widely understood as an integrated one-way manufacturing process, in which the raw materials are transferred to the production line, and the end products are transferred to the customers. However, in recent years, the concept of 'Green Supply Chain Management' has been developed, which focuses on the environmental issues. The study showed that forty measurement items affect the GSCM in the tile industry. Finally, these measurement items were ranked.

Key words: Green supply chain management, Tile industry, Environmental issues, Delphi study.
