Identifying the Drivers of Green Supply Chain Management in Tile Industry using Delphi Technique

RostamiFard M, Shekari H, Eslami S.

ABSTRACT: Supply chain management used to be widely understood as an integrated one-way manufacturing process, in which the raw materials are transformed into finished goods. However, green supply chain is classified as a more recent direction of supply chain management, which is focused on the reduction of environmental issues. This research aimed to identify the critical drivers of green supply chain management in the tile industry. The Delphi technique was used to identify these drivers. The study showed that forty measurement items affect the GSCM in the tile industry. Finally, these measurement items were ranked.

Effectiveness of Stress Management Training on Sensation Seeking, Depression and Stress among Mothers of Autistic Children

Taghizadeh Torqabeh Sh, Yaghoubi A, Hosseini SH.

ABSTRACT: The aim of the present study was to investigate the effects of stress management training on sensation seeking, depression, and stress among mothers of autistic children.
